

HiQu Digital Shower

Aqualisa HiQu digital shower mixer
(Processor and controller)

HQ1001 – For high water pressure
HQ1002 – Incorporates a pump for low water pressure

HiQu Digital Shower

Shower performance is second to none, providing a flow rate range capable of delivering a refreshing spritz, through to an invigorating drench. To conserve water or to ensure it will go further, select the 'eco-mode' on the processor box during installation. For super-quick installations choose an exposed shower which can be installed in as little as two hours with minimal mess and disruption to the bathroom.

HiQu Digital Shower controls

HiQu Shower controls have a luxurious metal finish, and are very simple to use.

They feature animated LEDs to show changes in temperature and flow.

Planning your HiQu Digital Bathroom

Digital bathroom technology brings so many advantages – perfect showers at the touch of a button, baths filled to your chosen depth and warmth, delivering a sensational experience every time.

Intuitive controls feature illuminated displays that show when your desired temperature and flow have been reached. You can even fill your bath or switch on your shower by remote control.

HiQu Digital concealed single outlet configuration with remote control

HiQu Digital Shower

HiQu Digital gives outstanding choice and flexibility, so you can create the bathroom that suits your family and lifestyle. Choose a fixed or adjustable head, or combine with an accessory pack to create a multiple outlet shower.

A data cable connects the HiQu's shower controls to a digital processor, where hot and cold water are perfectly blended and delivered to the shower head at the desired temperature and flow.

The shower controls and optional remote control can each be sited up to 10 metres from the processor. This means that the processor can be placed in the loft, airing cupboard or under the bath, and the remote control can switch on the shower from a convenient location.

HiQu Digital Bath

HiQu Digital Bath brings sophistication to bathing, with its simple to use controls and three programmable depth pre-sets, plus an optional remote control which allows you to fill your bath from up to 10 metres away.

Controlled by a compact, remotely sited digital processor, HiQu Bath uses an overflow filler rather than bulky taps and comes with a top up feature to reheat a cooling bath.

For added luxury you can team your digital bath fill with a sleek retractable hand shower.

HiQu Digital processor box options

Driven by Aqualisa's award winning digital technology, HiQu is controlled by a compact processor box which can be located 10 metres from the bathing area in the loft, airing cupboard or under the bath. It controls flow and blends hot and cold water with thermostatic precision, delivering perfect baths and showers every time. Remotely siting the processor box makes access and installation easy, eliminating the need for extensive excavation of the bathroom wall and damage to décor.

HiQu Digital processors are backed up by Aqualisa's 5 year manufacturer's guarantee.

Working with your water system

The correct processor solution for you will depend on the type of water system in your home. Choose from a HP/Combi compatible processor or Gravity compatible processor (with integral pump).

HiQu Bath with overflow filler and remote control

HP/Combi – Digital processor

Gravity – Digital processor with integral pump
